SNAPDRAGONS JOKE

“Come on up and join me in a joint”

So the lizard climbs the tree and the koala rolls him a joint and they sit there in companionable silence getting quietly stoned.

After a while the lizards says

“Geez koala I'm so thirsty, I can't just get my moisture from the gum leaves as you can – I've gotta get water” So down out of the tree and down to the river. While he's drinking, crocodile surfaces and says “Hi lizard what's up” so the lizard says

“I've just had a joint with Koala and it's made me thirsty” The crocodile says

“A koala smoking a joint- this I've gotta see” and he sets off into the scrub where he finds the koala still sitting in the tree completely stoned.

He calls “Hey Koala”

Koala looks down and says “Sheet lizard how bloody much water did you drink!!”

Omeo District Health Healthcare Worker Grade 1 – Casual

As a Health Care Worker, you will be providing personal and developmental care to clients, patients and residents. Responsibilities may include transportation, cleaning and housekeeping; support with meals and other health and wellness related activities. The Health Care Worker will have knowledge of the needs of the frail, aged and disabled people and demonstrate a commitment to best practice ensuring services are provided in a caring, respectful and dignified way.

Why Join our team Omeo District Health provides attractive conditions including generous Salary Packaging. Flexible working arrangements such as job-sharing options could be considered for this role.

Omeo District Health (ODH) is a publicly funded, Small Rural Health Service located in East Gippsland's High Country. This spectacular Alpine region of Victoria, is a lifestyle destination with Dinner Plain, Mt Hotham and Falls Creek alpine snow resorts a short drive away.

A great place to enjoy many outdoor pursuits.

Omeo will also soon have its own, competition level Mountain Bike Park currently in construction.

Should you wish to discuss the role further please contact: Leanne McKenzie, Home Based Services Manager on 5159 0100 or via email to: leanne.mckenzie@omeohs.com.au

For a full position description visit our website at www.odh.net.au

To apply, please submit a cover letter and resume to recruitment@omeohs.com.au

Applications close 5pm, 15th February 2025

Omeo District Health is a merit-based equal opportunity employer and encourages applications from people of all cultural backgrounds, including diversity (LGBTIQ) and people with a disability.

Applications are sought for the following position:

Volunteer Men's Shed Coordinator

**Monday and Friday
11.00am – 3.00pm**

Applications should be forwarded to:

Omeo District Health
Attention: Kylie Vanderbyl
PO Box 42, Omeo Vic. 3898
5159 0140

or email recruitment@omeohs.com.au

**Applications close COB
Friday 7th February 2025**

Hairdresser

**For the Residents of
Lewington House**

Service is required approximately
every 6 – 8 weeks

If you wish to discuss this further,
please contact:

Katie Van Heek, Corporate Services Manager

Phone (03) 5159 0100

RFDS mental wellbeing: Fortnightly face to face and telehealth model.

Memberships: \$50.00 family and \$25.00 single due 31st of July each year, pro-rata payments accepted for new members.

AGM: Occurs on the second Monday of October all welcome, new members to the COM welcome.

Follow us on facebook and our webpage for events and employment opportunities.

WEBPAGE

<https://www.ensaybushnursing.com.au>

An Australian Milestone.

On 6 February 1967, two Piper Pawnees from Benambra near Omeo, flown by aviation legends Ben Buckley and Bob Lansbury made Australia's first operational drop of fir retardant on a small lightning-strike.

The 15 loads were able to contain the remote fire to less than one hectare and buy enough time to enable ground crews to walk many hours across rugged terrain to reach it and make it safe.

Beginning in 1937, and then continuing after the war, the Forests Commission conducted a remarkable range of experiments with different aircraft such as heavy military four-engine bombers, single-seat fighters, and small agricultural aircraft with differing drop materials, techniques, and equipment. But this was the first real firebombing job and marked the beginning of modern aerial firefighting operations in Australia. GCIt was also what has become the classic application of firebombing and the "proof of concept" at Benambra encouraged many more innovations with new and more powerful aircraft.

And best of all, most of the pioneering work was done here in Victoria.

Highlights

As we welcome 2025, we extend our heartfelt gratitude to everyone who has contributed to the success of Swifts Creek Future. Thank you to our Leadership Group, the Innovation Working Groups (IWGs) made up of dedicated community members, local businesses, and organizations like East Gippsland Shire Council, Parks Victoria, Destination Gippsland, Australian Centre for Rural Entrepreneurship (ACRE), Department of Energy, Environment and Climate Action (DEECA), Swifts Creek Community Centre, and Deakin, RMIT, and Swinburne universities. Your commitment continues to drive this project forward. We welcome Kiri Allen to the role of Project Support Officer. Kiri brings a fresh perspective, strong organisational skills and a passion for fostering collaboration. We're excited to have Kiri on board and look forward to the valuable contributions she will bring to the team!

For more information or to get involved, please contact Alyce Richards, Project Manager, alycer@egipps.vic.gov.au or 0456 173 361.

If you would like to receive your newsletter digitally, please subscribe to our mailing list by emailing swiftscreekfuture@gmail.com or keep an eye on our website www.swiftscreekfuture.com.au

Collaborative Farming

In December 2024, Swifts Creek Future's Value-Add Primary Industry Innovation Working Group

hosted a workshop focused on value-adding in primary industries and exploring collaborative farming models. The event brought together local farmers, industry experts, and community members to discuss innovative approaches that could strengthen the region's agricultural future.

The workshop featured a panel of expert guest speakers:

Sam Marwood – Founder, Cultivate Farms

Sam provided valuable insights into creating farm ownership pathways for the next generation. Through his work with Cultivate Farms, Sam has helped develop innovative farm collaboration models across Australia. He shared success stories and strategies for building partnerships between retiring farmers, investors, and aspiring farm owners, emphasizing the importance of succession planning and shared investment.

Stephen Fisher – Managing Director, Circular Head Farms

Stephen Fisher presented Circular Head Farms' pioneering model, which leverages local investment to facilitate dairy farm ownership.

By pooling capital and expertise, Circular Head Farms has enabled aspiring farmers to sustainably own and manage dairy farms. Stephen's experience highlighted how collaborative models can foster agricultural innovation, improve efficiency, and strengthen rural communities.

Anthony Taylor – Policy and Government Affairs Manager, Business Council of Cooperatives and Mutuels (BCCM)

Representing the national peak body for co-operatives and mutuels, Anthony Taylor shared valuable insights on the role of co-operatives in agriculture. He outlined key benefits such as shared resources, reduced financial risks, and increased market leverage. Anthony also discussed how BCCM supports the development of cooperatives through policy advocacy and engagement with government.

Jayden Pearce – Upper Murray Beef

Jayden shared his experiences in establishing and managing a successful livestock enterprise with Upper Murray Beef. He explained how Upper Murray Beef's model started with a vision to launch a mobile processing facility, eventually leading to the successful acquisition of Corryong Butchers, which now supports their farm-to market operations.

Jayden's story underscored how cooperative approaches can help small producers overcome operational challenges and grow their businesses.

Next Steps – Developing a Collaborative Farming Feasibility Study

The workshop provided a opportunity for attendees to learn more about different models and practices in collaborative farming and opened up important discussions about potential models for the region. As

a result, the working group is now planning to develop a feasibility study to assess the viability of establishing a collaborative farming model in Swifts Creek.

The study will explore possible structures, benefits, and barriers to collaboration and identify how local farmers can work together to enhance productivity and profitability. A Request for Quotation will be developed and shared with consultants to obtain quotes in February 2025.

The working group encourages primary producers in the region to complete the Farmers Survey, this can be completed via the QR code or on paper and dropped into the Swifts Creek Community Centre or Swifts

Use the QR code to access the Farmers Survey digitally

Nature-based Recreation & Tourism

In December, a highly engaging and productive workshop on nature-based recreation and tourism was held in Swifts Creek. The workshop, facilitated by TRC Tourism, brought together community members, local business owners, and key stakeholders to discuss existing and potential opportunities for nature-based experiences in the region. With a strong turnout, the event fostered insightful discussions and generated valuable feedback that will inform the ongoing study.

The primary goal of the study, led by TRC Tourism, is to conduct a comprehensive analysis of the region's assets and opportunities. This includes:

Reviewing Existing Information:

Gathering and analysing local data and documentation related to tourism and recreation.

Gap Analysis: Identifying gaps in the current nature-based offerings and exploring new opportunities that could enhance the visitor experience and attract more tourists.

Policy Review: Examining relevant policies to ensure proposed initiatives align with regulatory frameworks and broader regional strategies.

Viability Assessment:

Determining the most economically and environmentally sustainable opportunities for development.

Key Outcomes from the Workshop

Existing Strengths:

Participants highlighted the area's unique natural assets, including pristine rivers, forests, and trails, as key strengths.

Current recreational activities, such as hiking, fishing, and cycling, were recognized as important offerings to build upon.

New Opportunities:

Ideas for potential new experiences, such as guided eco-tours, mountain biking trails, and adventure tourism activities, were explored.

Challenges and Barriers:

The group identified key barriers to growth, including limited accommodation options, lack of transport services, and seasonal access issues.

Community Involvement:

Attendees expressed a strong desire to remain actively involved in the development of future initiatives, emphasizing the importance of ensuring any new opportunities benefit both the local economy and the environment.

December Nature-based workshop facilitated by TRC

Next Steps:

The feedback and ideas gathered during the workshop will be integrated into the ongoing feasibility study. TRC Tourism will continue to engage with stakeholders as they refine recommendations for nature-based tourism development. The final outcomes of the study will guide future strategic investments and help position Swifts Creek as a sought-after destination for nature-based experiences.

The project aims to deliver initiatives that balance economic growth with environmental sustainability, ensuring long-term benefits for both the community and the natural landscape.

For further updates on the study or to learn how you can get involved, please contact Alyce Richards via email at alycer@egipps.vic.gov.au, call

Education & Skills

Members of the Education & Skills Innovation Working Group. Back Row: Kath Smith, Ondine Bradbury (Swinburne), Tim Fish (Monash), Emma Halafihi, Alyce Richards. Front row: Kiri Allen, Robert Boucher, Ray Gallagher.

Exciting progress is being made by the Education & Skills Innovation Working Group on an Education and Skills pre-feasibility study. Following a Request for process in December 2024, consultants “Skills 4 the Future” selected to lead the project.

The pre-feasibility study aims to explore the potential for developing a Live and Learn facility in Swifts Creek, focused on delivering experience-based learning opportunities tailored to the region’s unique strengths. Over the December-January period, Skills 4 the Future commenced their desktop research on Australian and International examples, policies and draft opportunities.

Consultation and engagement with the community and key stakeholders will begin in February 2025, providing an important opportunity for local input.

The study will examine how Swifts Creek’s existing industries—such as forestry, agriculture, and nature-based tourism—can form the foundation for hands-on learning experiences whilst providing locals with the opportunities to study locally and create a skilled and reliable work-force and develop employment opportunities.

In addition to identifying opportunities within current industries, the study involves a gap analysis by reviewing similar facilities in other regions. This approach will help to pinpoint un-tapped areas of potential that Swifts Creek could capitalize on, broadening its future skills and education offerings.

Key Objectives of the Study

Define Feasibility:

Assess the viability of establishing a live and learn facility that can offer both short-term and long-term educational programs.

Consultation and Engagement:

Gather insights from local businesses, educators, and residents to ensure the facility meets community needs.

Stage 1 Focus:

Concentrate on developing programs aligned with Swifts Creek’s existing industries while identifying future opportunities through research and engagement.

Barriers and Solutions:

Address potential barriers such as accommodation, transport, and resource availability to ensure the facility’s success.

Community and Economic Benefits:

Evaluate how the proposed facility could strengthen local industries, attract new residents, and contribute to long-term economic growth.

This study marks a crucial step in ensuring Swifts Creek remains future-focused by equipping current and future generations with the skills needed to thrive. Stay tuned for further updates as consultation gets underway in February!

For more information or to get involved, please contact Alyce Richards, Project Manager, alycer@egipps.vic.gov.au or 0456 173 361.
